

European Coatings Show 2019, Coatex team is about to unveil its latest rheological solutions

Coatex, a world leader specialized in rheology, will reveal its last solutions for low VOC waterborne formulations.

With other BUs of the Arkema Group, Coatex will highlight its thickeners and dispersing additives at the upcoming ECS 2019 in Nuremberg, March 19th-21st 2019, hall 4A booth #313

Always learning thanks to a skillful listening of the downstream industries, Coatex offers a full range of waterborne rheology modifiers. It is therefore with confidence that solutions can be found to achieve the different needs of automotive, industrial, furniture, flooring or architectural paints.

The sales and technical team will be presenting its new solutions during ECS, including:

- **A new PU thickener ICI driver, highly efficient and cost effective**
- **A new wetting dispersant, universal for waterborne industrial coatings and more...**

Get ready to visit us at our booth hall 4A #313 to find out more about our solutions.

Coatex designs and produces rheology additives for aqueous formulations and water-borne processes. With Innovation for Sustainable Development as a core strategy, Coatex is developing high performance additives to serve a wide variety of applications, such as Water-borne Paints & Coatings, Adhesives & Sealants, Paper Coatings, Minerals Processing, Construction, Homecare and Water Treatment. With production sites in France, the Netherlands, USA, China and Brazil, Coatex employs more than 450 people. Coatex is a subsidiary of the ARKEMA group, France's leading chemicals producer.
