

RHEOSOLVE™ D 15ASG

Dispersing agent for phosphate free formulations

RHEOSOLVE™ D 15ASG is a highly effective dispersing agent specifically designed for phosphate free automatic dishwashing formulations.

RHEOSOLVE™ D 15ASG prevents filming and spotting on all kind of surfaces including glasses. It also improves shine and soil removal.

• TYPICAL ANALYSIS

Nature: Polycarboxylic terpolymer

Appearance (20°C): White granules

Solids content (%): > 92

Bulk density: 450 to 650

Particle size above 1000 µm < 1%

Particle size below 200 µm < 5%

• ADVANTAGES

- Sequestering, Antiscaling and dispersing properties
- Provides high performance anti-filming and anti-spotting in phosphate-free formulations
- Improves shine & soil removal of all kind of surfaces including glasses
- Suitable for use in unit-dose, powder and liquid formulations
- Can be combined with acrylic homopolymers such as RHEOSOLVE™ D 5S when carbonates are a concern

• APPLICATIONS

- Phosphate-free automatic dishwashing formulations
- Multifunctional & standard formulations
- Powder, tablets & liquid gels

• STORAGE

RHEOSOLVE™ D 15ASG should be protected from humidity.

Once opened, packaging should be resealed immediately after use and kept in a dry place.

In these conditions, products should be used within 12 months after delivery.

• STANDARD PACKAGING

- Big bags
